Diesel Applicator Spray

Application

Spray in 1-second-intervals into air intake system (right after the air mass meter) while the engine is warm and running. Interrupt the process after each 5 to 6 sprays and bring the engine from idling to accelerated rate so that the product is completely sucked from the engine and so product residues in the suction circuit are avoided. Product works during application. Consumption depending on application. Recommended for use with every maintenance car service or when required.

Description

GAT Diesel Applicator Spray is for the cleaning and protection of the entire air intake system of diesel engines. Removes carbon deposits and residues in the air intake system, combustion chamber, throttle valves, EGR valves, inlet and outlet valves and valve seats. Suitable for use in engines equipped with diesel particulate filters.

Advantages

Only a clean fuel system guarantees clean and powerful combustion and efficient engine performance! Reduces the fuel consumption and the exhaust gas emission values. Ensures a smooth idling and powerful and even motor running.

Packing sizes	Packing Unit	Article Number
---------------	--------------	----------------

400 ml	12 x 400 ml	Art. 62035
--------	-------------	------------

other sizes available on request

Properties

Physical state	liquid
Color	colourless
Density	0,87 g/cm ³
Flash point	41 °C
Viscosity	<7 mm ² /s

Compatibility

Recommended for all diesel engines.

Safety instructions

Follow the application instructions on the technical data sheet (TDS). Read safety instructions in the Material Safety Data Sheet (MSDS) before using this product. Please keep out of reach of children. If medical advice is needed, have product container or label at hand and call poison centre/ doctor.

Disposal

This material and its container must be disposed of as hazardous waste. Handle contaminated packages in the same way as the substance itself. Dispose of this product and container according to national/ regional regulations.

Although our information is based on intense product tests and studying and therefore considered as reliable, it nevertheless has solely advisory character.
