

Technical Data Sheet

Reaction time
works during operation

Application field
for use in all hybrid-gasoline engines

Consumption
30 ml per 10 liter

Application interval
with every tank filling

Fuel System Cleaner HYBRID

Application

Recommended to add with every tank filling to the fuel tank before filling up. Product works during operation. Sufficient for 40 up to 60 L petrol.

Description

GAT Fuel System Cleaner Hybrid is a high performance additive especially for the combustion engines of hybrid vehicles for the effective cleaning of the entire fuel system from the tank to the combustion chamber. Protects from corrosion, removes operational caused contaminations, optimizes therefore the combustion process and maintains the engine performance.

Advantages

Clean and powerful combustion process and highly efficient engine running, especially in hybrid vehicles. Increased lubrication ability reduces wear, optimizes fuel consumption as well as emission values and ensures operational reliability especially at frequent load changes in hybrid vehicles.

Packing sizes	Packing Unit	Article Number
---------------	--------------	----------------

200 ml	24 x 200 ml	Art. 62161
--------	-------------	------------

other sizes available on request

Properties

Physical state	liquid
Density	0,82 g/cm ³ DIN 12185
Flash point	-9 °C ISO 3679
Viscosity	0,73 mm ² /s (at 40 °C) DIN EN ISO 3104

Compatibility

Recommended for all hybrid petrol engines.

Safety instructions

Follow the application instructions on the technical data sheet (TDS). Read safety instructions in the Material Safety Data Sheet (MSDS) before using this product. Please keep out of reach of children. If medical advice is needed, have product container or label at hand and call poison centre/ doctor.

Disposal

Dispose of this product and container according to national/ regional regulations.

Although our information is based on intense product tests and studying and therefore considered as reliable, it nevertheless has solely advisory character.
